Known Enablement Issues

For eZ Platform and eZ Studio, after v1.0 came out in December 2015 we on short term track **prioritized enablement issues** *(bugs and feature requests)* for being able to do full scale projects on the new generation, and migrate to it from 5.4. Here you can see them and their progress.

We aim to iterating on these issues over the bi-monthly releases in 2016, starting with 16.02 end of February.

Key	Summary	T	Created	Updated	P	Status	Resolution
