BlockingLimitation

> Available on version 5.3.2 and higher

A generic limitation type for use when no implementation has been made of a limitation, and it needs to be configured to avoid LimitationNotFoundException.
It is called blocking as it will always tell permissions system user does not have access on any policy it is assigned to, making permission system move on to next policy.

Identifier	n/a (configured for ezjscore limitation *FunctionList* out of the box)
Value Class	eZ\Publish\API\Repository\Values\User\Limitation\BlockingLimitation
Type Class	eZ\Publish\Core\Limitation\BlockingLimitationType
Criterion used	MatchNone
Role Limitation	no

Possible values

Value	UI value	Description
<mixed>	<mixed>	This is a generic limitations which does not validate the values provided to it, make sure to validate the values passed to this limitation in own logic.

Configuration

As this is a generic limitation you can configure your custom limitations to use it, out of the box FunctionList is using it in the following way:

```
# FunctionList is a ezjscore limitations, it only applies to ezjscore policies not
used by
    # API/platform stack so configuring to use "blocking" limitation to avoid
LimitationNotFoundException
    ezpublish.api.role.limitation_type.function_list:
        class: %ezpublish.api.role.limitation_type.blocking.class%
        arguments: ['FunctionList']
        tags:
            - {name: ezpublish.limitationType, alias: FunctionList}
```
